APPLICATIONS

IHC Techniques	Clone	Dilution	Antibody concentration	Antigen retrieval method	Visualization kit	Positive control	Negative control	Protein localization	Positivity in other species
Frozen tissue and cytopins									
Recommended	MUSE 286C	Neat	supernatant						
Paraffin tissue									
Recommended	MUSE 286C	Neat	supernatant						
Immunofluorescence									

MUSE286C mAb is able to detect human PLK5 protein in immunocytochemistry

To confirm that MUSE286C mAb recognizes human PLK5 protein, immunocytochemistry on frozen cytospin preparations of GFP-tagged human PLK5 expressed in HEK293 was performed. Cytospin preparation of human GFP-tagged human PLK1 protein was used as a negative control. Labeling with the anti-GFP antibody confirmed transfection efficiency.

MUSE286C mAb can be used to detect PLK5 protein in human paraffin tissues

WB Techniques	Clone	Dilution	Antibody concentration	Positive control	Negative control	Expected MW	Observed Mw	Positivity in other species
Western Blotting
